

FN3000 Load Cell Tension and Compression

- Heavy duty Pan-cake load cell
- Standard ranges 10 to 1000 kN [2 to 200 klb]
- Very high stability
- Aluminum or Stainless steel
- High IP protection available
- High Level Output Model with Integrated Amplifier

DESCRIPTION

The FN3000 measures tension and compression in standard ranges from 0-10 kN to 0-1000 kN. The mechanical design and gauge placement minimizes transverse effects. Depending on the range, the FN3000 is constructed in aluminium alloy or stainless steel and is available with numerous options. It is suitable for test bench applications and used in many hostile environments and can be customized for increased protection.

With many years of experience as a designer and manufacturer of sensors, Measurement Specialties, Inc. often works with customers to design or customize sensors for specific uses and testing environments.

To meet your needs we also offer complete turnkey systems. The matched components (sensor, power, amplifier and digital display) are formatted, calibrated and ready for immediate use.
